

MOSI SCOUT PROGRAMS

MOSI's Camp-In Themes

Action Reaction Camp-In

Begin the evening with an explosive show in the Coleman Science Works Theater. Explore polymer chemistry by testing and reacting chemicals to create ooey, gooey substances. Experiment with cryogenics.

Cosmic Camp-In

Explore the cosmos with an amazing show in The Saunders Planetarium. Investigate and create comets using dry ice. Learn the basic parts of a telescope. Design a space probe that can travel to other worlds.

Lipstick and Lollipop/Make Up

Magic Camp-In

Make your own lip gloss, body glitter, perfume, exfoliant and other body products using stuff around the house and explore MOSI at night!

Weather Watch Camp-In

Work on your Weather Watch badge! Visit Disasterville and tour MOSI's advanced natural disaster emergency center, *WeatherQuest*. Get ready for a crash course in meteorology, mass media, and emergency management. Measure, track, and predict severe weather and natural disasters. Send planes into dangerous areas to help civilians survive nature's fury. Keep the public informed through news broadcasts.

All About Sharks Camp-In

Ever thought about being a marine biologist? Have you ever wondered what a shark's skin feels like or wanted to get up close and personal with a shark's teeth? Join us and dissect squid and a shark! Get aggressive on the shark decline issue! Learn what makes sharks the top predator in the sea yet still need our help. Explore MOSI at night.

Reserve a private Camp-In (minimum 40 scouts) by calling (813) 987-6000.

MOSI's Field Expeditions

Fossil Dig (3-4 hours)

Take a trip to the Vulcan Mines and dig for fossils of prehistoric animals. Previous finds include ancient sea biscuits, sea urchins, and other marine fossils. Discuss prehistoric Florida and its prehistoric inhabitants. Don't forget something to dig up and to hold all your earthly treasures!

Meet near Vulcan Mines. Map: tinyurl.com/6o9ono

Cave Exploring (3-4 hours)

Explore underground caverns and amazing sinkholes as we learn about stalactites, stalagmites, and other geological treasures in the caves of the Withlacoochee State Forest. Discuss the geology of Florida. This program involves walking and some crawling.

Meet near the Withlacoochee State Forest.

Challenger Camp-In

Soar into the Verizon Challenger Learning Center. Experience how teamwork and imagination are essential to the success of the mission. Your mission: work together to land the space shuttle, switch crews, assemble a probe and launch the shuttle and probe. Join the MOSI crew in The Saunders Planetarium for a unique adventure that is out of this world!
